Ex. No. 1	Design a Web Page using HTML
Date of Exercise	12.07.2023

Aim

To create a HTML web page for your Personal Profile that conforms to HTML features and has the following elements: doctype, html, meta (in the revised html5 format), title, head, body, div, p, headings, image, anchor, table, list, html comments.

Description

- Hypertext Markup Language (HTML) is the standard markup language for documents designed to be displayed in a web browser.
- HTML headings are defined with the <h1> to <h6> tags.
- <h1> defines the most important heading. <h6> defines the least important heading.
- The HTML element defines a paragraph. is a block level element.
- The <hr> tag defines a thematic break in an HTML page, and is most often displayed as a horizontal rule.
- The HTML

 br> element defines a line break.
- The <a> tag defines a hyperlink. The href attribute specifies the URL of the page
- The tag is used to embed an image in an HTML page. The src attribute specifies the path to the image. It contains width and height.
- The HTML tables are created using the tag in which the > tag is used to create table rows and tag is used to create data cells.
- An unordered list. This will list items using plain bullets.
- An ordered list. This will use different schemes of numbers to list your items.

Program

```
<!DOCTYPE html>
<html lang="en">
<head>
  <meta charset="UTF-8">
  <meta http-equiv="X-UA-Compatible" content="IE=edge">
  <meta name="viewport" content="width=device-width, initial-scale=1.0">
  <title>Document</title>
  <link rel="stylesheet" href="CSS.css">
</head>
<body>
  <div style="background-color: black; width: 100%; height: 750px;">
    <div style="background-color: lightseagreen; width: 30%; height: 100%; float:left;">
       <img style =" outline-style: solid; outline-color:aquamarine;margin: auto; margin-top:</pre>
10%; display: block; border-radius: 100%;" Src="Pic.jpg" width="50%" height="20%">
       <div style="margin: 7%;">
         < h3 >
           About me
         </h3>
         <hr style="width:80%;text-align:left;margin-left:0">
         I have been worked in few moded game projects for past few years. I prefer to
```

work as a team because i can learn new stuff apart from work. It also help

me to explore new character of person. I like to change my path from moded game Developer to web developer

because it allows me to learn new things. Learning new is the best feed for brain.

```
< h3 >
         Contact
       </h3>
       <hr style="width:80%;text-align:left;margin-left:0">
       <b>Address:</b><br>A-163 NGO Colony<br><br>
         <b>Mobile:</b><br>7598393250<br><br>
         <b>Email:</b><br>bewinfelix@karunya.edu.in<br>
       </div>
    </div>
    <div style="background-color: lightgrey; width:70%; height: 100%; float:left; margin:</pre>
0px;">
     <div style="margin: 5%;">
       <h1>Bewin Felix R A</h1>
```

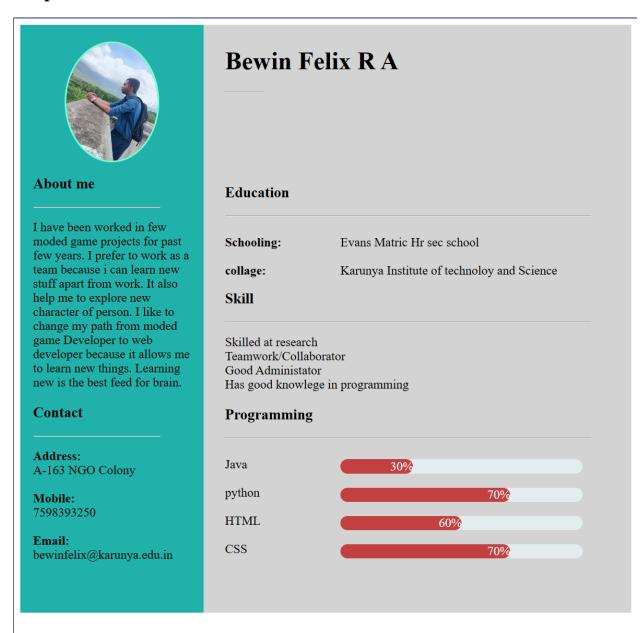

```
<h3>Education</h3>
